

CLEAR COATINGS FOR ACID STAINING

FORTIS COAT519

A high solids, one component, clear and non yellowing moisture cured polyurethane coating. It is developed for use as a high performance, abrasion resistant, clear urethane finish for wooden floors, cork tiles and cementitious substrates. Suitable for interior or exterior use, non-slip granules can be incorporated to provide an effective non-slip finish. Tyre stain resistant, it has low odour and is xylene free. Available in gloss and matt.

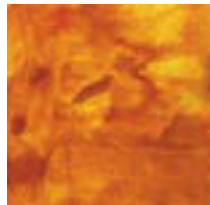

FORTIS COAT526

Water-based two component clear polyurethane. These high performance products are non-yellowing and have low odour. Primers for concrete and wood are available – FORTIS PRIME520 C/W. Available in gloss, satin and matt.
